

Wild World

Where do these animals live?

Key Vocabulary	
The Environment	The natural world of land, sea, air, plants and animals.
Habitat	A place where animals and plants live and grow.
Desert	A place that has very little rainfall. Usually hot but they can be cold too.
Jungle	A hot, thick area of forest with lots of plants tangled together.
Rainforest	Rainforests are very similar to jungles, but they have a lot more tall trees that block out most of the sunlight.
Arctic	The area around the North Pole. Polar bears and arctic foxes live here.
Antarctic	This is where the South Pole is. Penguins live here.
Minibeast	Minibeasts are 'small creatures' like worms, snails, insects and spiders. The scientific term for them is 'invertebrates' – a creature without a backbone.

Jungles are very hot, but it also rains a lot in jungles. Monkeys, elephants and tigers live in jungles.

The Sahara Desert is the hottest desert in the world.

The Antarctic Desert is the world's largest desert.
