

What happened
on your jungle
adventure?

Physical features (Natural features of the earth's surface)			Human features (Things that are made or built by humans)		
					
Mountain	River	Valley	Road	Factory	Shop
					
Volcano	Beach	Cliff	City	Harbour	Village

Plants grow in different locations across the world.

Some plants need warm, moist environments to grow.

Some plants that live in dry climates have long roots that can store lots of water.

Some plants can even grow in shallow water, because it provides lots of sunlight.
