

What did the gingerbread man see on his journey?

Maps show us information about the world in a visual way.

An ariel map is a map that shows a specific area from above (sometimes called a bird's eye view).

A compass is used to indicate direction. This shows us which way our map should be facing.

A key is used to explain the symbols shown on a map.

N = North  
E = East  
S = South  
W = West

This is so anyone picking up a map can understand what each picture means and where they might find certain landmarks.

**Key Vocabulary:**

Map	Atlas	Ariel	Compass	North	East	South
West	Key	Symbols	Direction	Landmarks
