What Makes the Earth Angry?

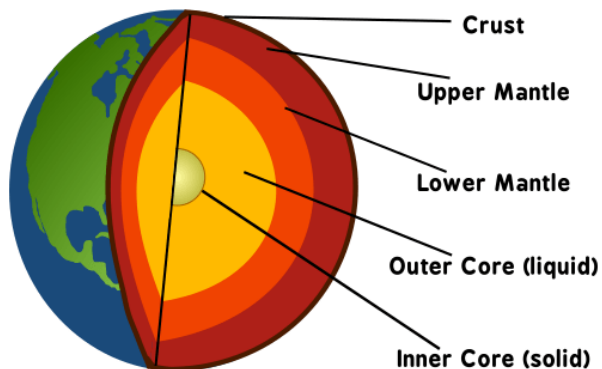

Key Vocabulary:

- Volcanoes
- Earthquakes
- Tsunamis
- Mountains
- Rivers
- Tectonic plates
- Earth
- Map
- Biomes
- Continents
- Natural resources
- Globe
- Fertile land
- Land use
- Active
- Dormant
- Extinct
- Crust
- Core
- Mantel
- Lava
- Magma

There are positives and negatives to living near a volcano.

The soil around it is very fertile meaning it is great for growing crops.

The different layers of the Earth have different properties. Some of these affect Earth's surface such as erupting volcanoes.

Earthquakes are caused by the tectonic plates on Earth's crust moving together across fault lines.
