

What is your favourite toy and why is it special to you?

Materials and their properties

Metal

Wood

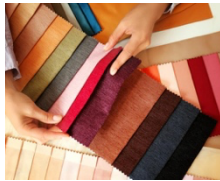

Plastic

Glass

Rock

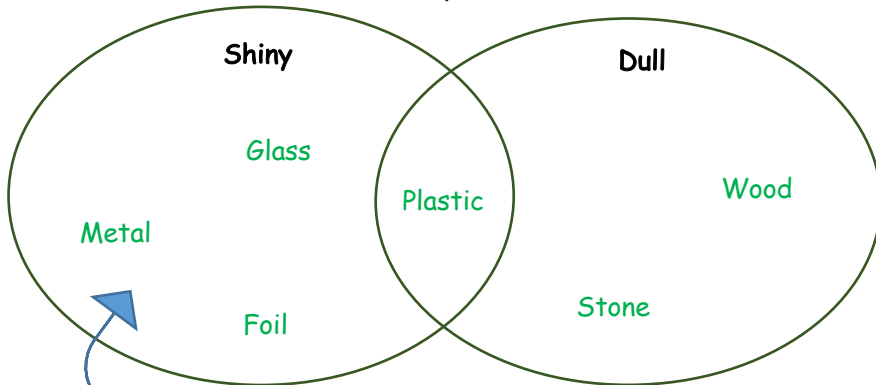

Fabric

Plastic is the best material to use for an umbrella because...

... it can be moulded, it is waterproof, it is light, and it comes in lots of different colours.

Materials can be sorted into groups according to their properties. For example:

We can use many different words to describe the properties of materials:
 Hard / soft / transparent / opaque / flexible / strong / waterproof / shiny / rough / bendy / stiff / smooth / magnetic

| Key Vocabulary: | | | | | | |
|-----------------|----------|------------|----------|-------------|-------|-------|
| Material | Property | Waterproof | Flexible | Transparent | Glass | Metal |
| Plastic | Wood | Rock | Fabric | Shiny | Dull | |
