

Hello Hedgehog Class,

Hope you are all keeping safe!

Here is some work for you to look at today so that we are ready to keep going with our learning tomorrow.

**English:** In English this week, you are going to be writing your stories about going to your own fantasy land and you started to plan some ideas in pictures and by talking about it last week.

Use today to add some details to your ideas so that we can fill in the attached planning sheet in tomorrow's lesson. You can draw your idea for each question or write down some key words.

**Maths:** Try some more practise of adding and subtracting 10 from different numbers. You can try the quizzes on this link:

<https://wordwall.net/resource/9771435/10-more-10-less>

Or do the two worksheets that are attached.

**Science:** In Science we are continuing to think about different materials. Can you remember the names of the different materials in the picture and then say which properties they have? (I have given you the key adjectives for describing properties). Then look at the pictures of different objects and think about which ones are similar. Can you put them into groups and say why.

I look forward to seeing or hearing what you have done.

Mrs Asfaw
